Institute of Industrial Engineers

Region 16
Central & South America
Vision

Our vision is to be an icon association regionally, promoting the importance of Industrial and Systems Engineering profession worldwide, providing for the end of 2015 period association the punctual idea of being a professional for the student population and settle de 977 chapter for more incomings goals.

Mission

Our mission is to accomplish all activities required to be notice and recognized at region and global level, at the same time been able to strengthen the relation between internal student population and the professional one, being of important interest the professional development and job opportunities sites.
Induction to Career
For the new students entering to the university, it is organized an induction so they get to know better their career of interest. Here, the association prepares a stand with information about the career of Industrial Engineering. The new students also participate in an activity with the members of the association to have a more interactive relation.
Saint Valentine’s Fair

The association was part of the Valentine’s Day Fair, where products related to the event were sold to collect funds for future chapter’s activities.
